

Upper County Pool and Recreation Center Survey

The Kittitas County Public Health Department is asking for help collecting information on whether a community swimming pool or recreational center (with a pool) would be beneficial to Upper County families by completing a short anonymous survey. Results of this survey will provide an idea of the number of people interested in a pool or recreation center (with a pool), as well as the services and amenities that facility should provide. This data is crucial to the planning and community involvement process!

Thank you in advance for taking the time to follow this link or QR Code to take the brief (anonymous) survey!
