

Cle Elum Pines West Development begins Friday July 7

The planned mixed use development “Cle Elum Pines West” starts their project Friday July 7 by removing trees on their property bordered by Denny Avenue on the east, State Route 903 on the south, and the County transfer station on the west. This action was approved by the City of Cle Elum in 2014 through an annexation and development agreement, by the Washington Department of Natural Resources 2017 Forest Practices Approval for tree removal and the Washington State Department of Ecology 2017 Construction Stormwater Permit.

This will be the first phase in site preparation for the development. Construction of the first eight homes will begin once the site preparation actions are complete and all permits are received.

For questions, please contact Lucy Temple at City Hall, 674-2262.
