

Cle Elum's Bicycle and Pedestrian Plan: Help Identify Priority Corridors and Treatments

For over a decade, Cle Elum has planned and designed bicycle and pedestrian improvements to make areas in the city safer and friendlier for non-motorized transportation options. In 2016, the City was successful in obtaining a grant to producing a single document that communicates Cle Elum's existing and planned bicycle and pedestrian transportation systems.

Cle Elum will use the following process to plan for priority corridors in the community:

- identified and defined commonly used corridors,
- evaluated the conditions of priority corridors,
- determined the vision for each of the priority corridors,
- decided which strategies to use to accomplish the projects in the corridors, and
- set a timeline to complete the work.

The majority of the Cle Elum Bicycle and Pedestrian Plan concentrates on current and planned bicycle and pedestrian facilities within Cle Elum city limits although there is mention of connections to more regional trails and systems. For example, there is reference to and some detailed information about the bicycle and pedestrian connections between the City of Cle Elum transportation system and both the John Wayne Pioneer Trail and Coal Mines Trail.

You can participate in the process early by taking the survey at:
