

## 47° NORTH SUPPLEMENTAL EIS

### Environmental Issues to be Studied

The City has determined that all the environmental issues studied in the original 2002 Cle Elum UGA EIS and indicated below will be reviewed, updated, and discussed as appropriate in the SEIS. In addition, Greenhouse Gas (GHG) Emissions will also be studied.

- **Earth** – soils, geology, topography
- **Water Quantity & Quality** – surface water, groundwater, stormwater management, water supply
- **Plants and Animals** – wildlife, habitat, wetlands, fisheries
- **Air Quality** – air and GHG emissions
- **Noise** – noise generation
- **Land Use/Relationship to Plans and Policies** – land uses, relationship to State, County, City, and other relevant plans/policies
- **Population, Housing, & Employment** – population, housing, and employment increases
- **Aesthetics** – compatibility, views, light and glare
- **Cultural Resources** – archaeological and cultural resources
- **Parks and Recreation** – parks, trails, recreation facilities
- **Transportation** – motorized and non-motorized transportation
- **Public Services** – police, fire/emergency medical services, schools
- **Utilities** – water, sewer
- **Economic & Fiscal Impacts** – jobs, investments, economic development; revenue/cost impacts
