**CITY OF CLE ELUM NOTICE OF TOWN HALL MEETING
COLUMBIA AVENUE RAILROAD CROSSING FEASIBILITY STUDY**

The City of Cle Elum was awarded grant funding from the Quad County Regional Transportation Planning Organization to study the possibility of extending Columbia Avenue from East First Street across the BNSF railroad tracks and ultimately connect to the City's Wastewater Treatment Plant (WWTP). Current access to the WWTP and adjoining parcels is only available via a private crossing on Owens Road with minimal signage. The study will assess the viability of extending Columbia Avenue as a city street after examining technical, economic, financial, legal, environmental, and equity considerations.

As a kickoff to the study, the city will be hosting a Town Hall meeting to provide a project overview, discuss the project schedule and approach, and answer questions that the public and property owners might have. Join us:

**Wednesday, February 21, 2024 at 6:00 PM
Cle Elum City Hall, 119 W First Street, Council Chambers**

If you are unable to attend the meeting, but have questions regarding the project, please contact project lead, Jacob Sevigny, PE at (509) 966-7000 or jsevigny@hlacivil.com.
